Consulting Architectural Firm:

The Village Building Oversight Committee is working with Symmes Maini & McKee Associates (SMMA), the architectural firm used in 1999, 2002, and 2004 to develop the original Master Plan and subsequent Village School reports. Using SMMA's staff of architects, engineers, cost estimators, and schedulers, the scope and line item costs for the project have been determined and updated for each report, including this spring. The Village BOC has also walked through the building with two independent project management firms (KVA and URS) to confirm the approach and costs of the project.
